Bloom and Petel flower shop

How are daily operations managed (inventory, preparation)?
How are large event orders handled?

1) About the Business

Bloom & Petals is a flower shop with a retail storefront that also offers online services, specializing in the cultivation, arrangement and distribution of fresh flower and floral arrangement. The business operates as a hybrid retail store, combining both physical store and an e-commerce platform to supply customers with all their needs related to flower. Bloom & Petals sources flowers from local growers and regional suppliers, to ensure quality and freshness. The business caters to individuals, corporate clients and event planners who require high quality floral arrangement for personal celebration, corporate events, holidays and special occasions (ex. Wedding).

Slightly general and could include more operational detail

2) Services the business offers

- Fresh Flower Sales: Individual cut flowers sold by stem or bundles, seasonal flower selections, and high-quality imported flowers.
- Floral Arrangements: Custom-designed arrangements for various occasions and pre-designed arrangement packages.
- Delivery Services: Local delivery within the city, same-day delivery option (additional fee), and scheduled delivery for future dates.
- Payment Processing: Cash payments (in store only), credit and debit card payments, online payment gateway, and mobile wallet payments.
- Consultation and Design Services: Free in-store consultations and virtual consultation via video call.
- Floral Workshops: Offering beginner to advanced floral arrangement courses in-store or online.
- Subscription Services: Flexible weekly, monthly, or yearly flower delivery with customizable schedules and arrangements.

How are these services performed operationally?
Who is responsible for each service?

Some services include **system-related elements**:
online payment
virtual consultation

Slight mixing between business and system

3) Business capacities

Avoid wide ranges and approximations

Customer Base: 500-1,000 customers per month.

Product Inventory: 60-70 different types of flowers in inventory at any given time.

Sales Volume: 2,500-3,000 arrangements/bundles per month.

Delivery Fleet: 4 vehicles capable of 90-100 deliveries per day.

4) Business Revenue

- Direct Sales Revenue (55%): Retail sales with cost ranging from \$10-15 arrangement design fees.
- Delivery Service Revenue (20%): Standard delivery: \$5-9; Same-day: +\$10-15.
- Events and Wholesale (15%): Bulk order and events.
- Workshops and Subscription Services (10%): Online floral workshops (beginner to advanced) starting from \$20 per session. Flexible weekly, monthly, or yearly flower subscriptions starting from \$15/month.

5) Business Process

Some steps are **system-oriented**:
website interaction
order confirmation

In-Store Purchase: Browse → Select items → Consult florist (optional) → Receive

Online Purchase: Visit website → Browse → Add to cart → Enter delivery info → Pay → Order confirmation → Flowers arranged → Delivery scheduled

Custom Order: Call/visit → Consult designer → Designer creates arrangement → Payment → Delivery/pickup

Add more detail about employee involvement

6) Employees and their Roles

Provide exact numbers

The business employs approximately 12-15 staff members organized as follows:

- Management (2): Owner/Manager and Assistant Manager.
- Design and Production (3-5): Head Florist, Senior Florists, and Junior Florists.
- Sales and Customer Service (3-4): In-Store Sales Associates and Online/Phone Support Specialist.
- Delivery and Logistics (4): Delivery Drivers for vehicle operation and logistics

7) How Customers Will Know About the Business

Bloom & Petals uses a multi-channel marketing strategy to build brand awareness and attract new customers across both local and online audiences.

- **Commercial Booths and Pop-Up Stalls**

Bloom & Petals will set up branded commercial booths at local markets, malls, community fairs, and seasonal events (such as Valentine's Day and Mother's Day markets). These booths will feature fresh flower displays, sample arrangements, and promotional offers to attract walk-by customers and drive them to both the physical store and the online platform.

More detailed than required for business definition

- **Social Media Marketing**

The business will maintain active profiles on Instagram, Facebook, and TikTok, regularly posting high quality photos and short videos of floral arrangements, behind the scenes workshop content, and seasonal promotions. Paid targeted ads will be used to reach local customers based on location, interests, and upcoming occasions.

- **Partnerships and Collaborations**

Bloom & Petals will partner with local wedding planners, event organizers, hotels, and corporate offices to become their preferred floral supplier. These B2B relationships generate consistent orders and act as indirect advertising when the business's arrangements are featured at high-profile events.

This requirement was developed by the customer Group 2, which consists of the following Customers:

Abdallah Kokash
Hanna Kaibni
Jamil Habash
Bilal Ashhab

This requirement was developed for Developer Group 3, which consists of the following Developers:

Marwa Faqeeh
Roa Makhtoob
Shaymaa Dar Taha
Abeer Hussein

Group 1 will write the requirement for Group 2 (US) which consist of the following customers:

Adel Khair
Abdallah Akhras
Carlos Khamashta
Tala Hussary
