

Phase Two: Requirement Engineering- Elicitation & Discovery

Task 2.1: USER REQUIREMENTS

Task 2.2: SYSTEM REQUIREMENTS

Task 2.3: EFFORT+TIME ESTIMATION

Deadline: Tuesday 5 May 2026

Dear Students,

After Developer Groups have received their business description/statement (Task 1.1) and met their customer groups, **Developer Groups** are required to undertake the following project development work. In this phase, each developer group is required to undertake, complete and submit the following tasks on the above deadline:

Task 2.1: [Group Task] USER REQUIREMENTS

From Task 1.1 (and meetings with the customer group), each developer group should develop a good understanding of the overall requirements of their allocated business and more specifically its User Requirements. For this task, each developer group should develop and write a list of USER REQUIREMENTS of the business. For the allocated businesses, it is expected to have between 6-10 user requirements (i.e., not less than 6 but not more than 10). Remember, each user requirement represents a different (business) service, function or aspect of the business. Examples of User Requirements are provided in the lecture slides.

Task 2.2: [Group Task] SYSTEM REQUIREMENTS

Based on Task 1.1 and Task 2.1 above, each group should develop System Requirements for each defined user-requirement (from Task 2.1). For this task, each group should develop and write detailed SYSTEM REQUIREMENTS of their business. Remember, System requirements are detailed requirements for each of the USER requirements, describing the system perspective needs for each, as described in the lecture.

Task 2.3: [Group Task] EFFORT+TIME ESTIMATION

Based on Task 2.1 to Task 2.2 above, each group should develop an Estimation of the required effort to develop the project. For this task, each group should develop and write effort, cost and time estimation, as described in the lecture.

=> **Submission:** Each group must submit complete description for the above tasks, on ITC as a reply to this message on the above deadline, in **one PDF File**, its filename as "G [Number]-Phase2".

=> In developing the above tasks, each Developer Group is expected to meet with their respective Customer group, off class, to workout user and system requirements. Each Developer group is expected to note the date & time, name of attendees and topic of discussion of their meetings with their respective customer groups, and submit these details on an additional page, titled "Minutes of meetings".

=> The above Tasks are noted as Group Tasks. For *group tasks*, the group must discuss and then decide who would lead the task and the other members that will contribute to the task (e.g., **in reviewing, discussing, re-writing**, re-drawing, finalising etc.), based on their management strategy. The Name of the Lead of each group task and contributing members should be clearly written on *[the top of]* the task, (e.g., Lead: [name]; contributors: [name: reviewing], [name: discussion] etc.). Groups that have no names written clearly on them on their tasks, will be disadvantaged.
